

Parents (2015-2017) Spouse/Partner Roster

Title

Parents (2015-2017) Spouse/Partner Roster

Abstract

The parent data files contain social, demographic, behavioral, and health data collected in 2015-2017 on a probability sample of Add Health parents who were originally interviewed in 1995 and coincide with Wave V of Add Health. Data for 2,013 Wave I parents, connected to 2,244 Add Health respondents, are available. Additionally, 988 current spouse/partner interviews are available. These data can be linked with Wave I parent data, and corresponding Add Health respondents at Waves I – V. Includes weight files.

Variables: 10

Observations: 1,406

4	seldom
5	never

 P2WP0B - S7Q0B UNDERSTAND AHSM-P2

Type	Code
Measurement Unit	numeric
P2WP0B	You just do not understand [AHSM FIRST NAME].
1	always
2	often
3	sometimes
4	seldom
5	never

 P2WP0C - S7Q0C TRUST AHSM-P2

Type	Code
Measurement Unit	numeric
P2WP0C	You feel you can really trust [AHSM FIRST NAME].
1	always
2	often
3	sometimes

4	seldom
5	never

 P2WP0D - S7Q0D ARGUE WITH AHSM-P2

Type	Code
Measurement Unit	numeric
P2WP0D	How much do you fight or argue with [AHSM FIRST NAME]?
1	a lot
2	some
3	a little
4	not at all

 P_LVLFLG - SUBSET FLAG FOR PARENT-LVL SP ROST-P2

Type	Code
Measurement Unit	numeric
Description	Note: Data for the Parent Study was collected from parents of Add Health Sample Members. The data is being released, however, organized by the AID of the Add Health Sample Member. If a given parent has more than one child who participated in Add Health, that Parent's record will appear more than once in the Parent2 and SP2 files. Likewise the roster files are repeated for each Add Health Sample member belonging to the parent. If users prefer to use a roster file that contains only one roster per Wave 1 Parent, they can use P_LVLFLG=1 as a subsetting condition.
P_LVLFLG	Subset flag for Parent-Level Spouse Partner Roster
1	subset this record for parent-level file
