Wave III Grouping Data

Title

Wave III Grouping Data

Abstract

Pseudo state, county, tract, and block group variables in FIPS code format that allow grouping of Add Health respondents geographically (based on Wave III addresses).

Wave III Sex Ratio Data

Title

Wave III Sex Ratio Data

Abstract

In this file are constructed variables at the county-level for sex ratios for males to females ages 18 to 29, 30-34, and 18 to 34, the proportion of males and females ages 18 to 34, and the sex ratio of employed males 16 years and older to the total number of females 16 years and older for the white population and the black or African American population.

Variables: 11

Observations: 15,197

Wave III College Mobility Data

Title

Wave III College Mobility Data

Abstract

These data were collected from a sample of college students who were born between 1980 and 1982 and who attended a college or university in the early 2000's. At Wave III of the Add Health survey, respondents were asked if they were currently enrolled in a postsecondary institution. At Wave IV of the Add Health survey, respondents were asked if they had received a bachelor's degree. Respondents who answered in the affirmative were then asked to report the institution from which they were currently enrolled or received this degree.

Wave III Sexual Minority Policy Data

Title

Wave III Sexual Minority Policy Data

Abstract

This database includes indicators of the policy context for sexual minorities (a population typically defined based on co-residence with a same-sex partner or self-identification as gay, lesbian, or bisexual) in Waves III & IV of Add

Health. These data will enable researchers to examine how state-level policies in young adulthood are associated with a wide range of indicators of health and well-being among sexual minorities.

Variables: 4

Observations: 15,197

Waves III-V Multi-year Air Pollution Exposure Estimates

Title

Waves III-V Multi-year Air Pollution Exposure Estimates

Abstract

The air pollution data described here provide longer-term estimates of air pollution exposure that can be used to address a broad range of research questions related to how air pollution exposure over time may relate to a variety of health outcomes.

Variables: 33

Observations: 20,745
